## ABOUT ME

---

Seasoned Frontend Developer with a strong focus on modern technologies. Experienced in building and maintaining scalable micro-frontends and collaborative components in fast-paced agency and large-scale product environments. Proven ability to enhance application quality through comprehensive testing, code refactoring, and a commitment to best practices.

## EXPERIENCE

---

### Senior Frontend Developer

Globant

Santa Fe, Argentina

Aug 2023 - Present

- I participated in the development of new features across multiple micro-frontends, collaborating closely with cross-functional teams to design and deploy shared, reusable components that enhance development velocity and ensure consistency. I also focus on rapidly prototyping functional products. Additionally, I implement and develop features using test-driven development (TDD) practices to ensure code reliability, maintainability, and long-term scalability.

### Ssr. Fullstack Developer

Kenility

Santa Fe, Argentina

Nov 2021 - Aug 2023

- My focus was on enhancing application quality and maintainability by establishing robust unit testing practices and leading code reviews. I engineered and executed comprehensive end-to-end tests, significantly increasing reliability. My responsibilities also included designing and implementing RESTful APIs to manage critical data transfers and ensure seamless front-to-back-end communication.

### Ssr. Frontend Developer

MercadoLibre

Santa Fe, Argentina

Aug 2020 - Nov 2021

- I developed and maintained critical modules for internal logistics applications that support core business operations. My contributions included building data-driven reporting tools for metrics and route planning to enhance operational efficiency. I also shipped key features for vehicle and driver management systems, directly impacting logistics workflows and data integrity.

### Ssr. Fullstack Developer

Crombie

Santa Fe, Argentina

Nov 2019 - Jun 2020

- Delivered end-to-end full-stack applications for enterprise clients, integrating with headless CMS systems for flexible content management. A key project involved architecting and building automated web crawlers in Python to aggregate business intelligence data. I was also responsible for maintaining and troubleshooting production software to ensure high availability.

### Ssr. Fullstack Developer

Innova 4J

Valencia, Venezuela

Mar 2018 - Sep 2018

- In this role, I built and deployed custom web applications to streamline internal business processes. A primary achievement was the successful integration of core ERP systems with these applications, which centralized data management and significantly enhanced operational efficiency across the company.

## SKILLS

---

**Languages:** Typescript, Javascript, Python

**Libraries & Frameworks:** React, Redux, Next.JS, Vite, Cypress, Jest

**Databases:** SQL, MongoDB, Firebase

## EDUCATION

---

Universidad José Antonio Páez, San Diego, Carabobo, Venezuela

2013-2018

Bachelor of Science in Computer Science
